# Bishop Abimbola AKIN-THOMAS
## Frontend Developer | Blockchain Developer

akinthomasbishop25@gmail.com    07012991154    Abuja, Nigeria

## Profile

I'm a frontend developer, aspirant blockchain developer, and enthusiastic learner honing my skills in data science and AI. With a strong foundation in web development and a keen interest in cutting-edge technologies, I thrive on creating exceptional user experiences and pushing the boundaries of what's possible in the digital realm.

## Experience

**Frontend Developer, Blockchain Developer**    Jun 2023 – Jul 2023

*Hedera Hashgraph Hackathon, Remote*

**Technologies**: React, Hashgraph & Hashconect (Hashpack), Solidity, JavaScript

On the hedera blockchain, I partook in a hackathon with a team where a real-world project named "LoanLink" was created.

**SIWES Intern**    Mar 2023 – Sep 2023

*National Center for Artificial Intelligence and Robotics, NCAIR || NITDA*

**Technologies**: Python Langchain Javascript (React) etc.

During my SIWES training, I competed in Kaggle tournaments, worked on real-world projects, such as the NCAIR chatbot created utilizing NLP (Langchain) and other deep learning technologies, and learned about data science and AI. I personally increased my understanding of blockchain development.
These projects improved communication and collaborations within NCAIR.

**Decentralized Raffle Project**

*Personal Project*

**Technologies**: NextJS Solidity Javascript HTML CSS Hardhat

Created a decentralized lottery application and a fund raising application using solidity to write the smart contracts, Hardhat (Javascript framework) to test and deploy on the sepolia testnet.

## Skills

**React**

**Javascript**

**Solidity**

**NextJS**

**Typescript**

**Chakra UI**

**Git**

**HTML**

**CSS**

**Python (Data Science, AI)**

**Blockchain Engineering**

**Bootstrap**

## Education

**B.Sc Computer Science**                  **Jan 2021 – Present**
**Landmark University, Kwara State**

## Certificates

**Zuri Certificate**                              Aug 2022
Certificate of participation and completion

**Freecodecamp (Data Structures and Algorithm)**        May 2023
Certificate of course completion

**Udemy (Ethereum and Solidity: The**            Jun 2023
**complete Developer's Guide)**
Certificate of course completion

**NDG Python Beginners Class**                  Mar  2023
Certificate of course completion
Project on a python contact book

**NDG Python Intermediate Class (Data Science)**        Apr  2023
Certificate of course completion
Kaggle competition participant
